

DECLARATION OF COMPLIANCE OF ALUMINUM AND PLASTIC ARTICLES INTENDED FOR FOOD CONTACT UNDER APPLICABLE REGULATIONS

Compliance

Hereby we declare that the food contact material (FCM) "PP FOOD SCRAPERS hereinafter referred to as the "article" is compliant with the following legislations:

European Legislation:

- Regulation (EC) No. 1935/2004
- Regulation (EC) No. 2023/2006 and subsequent updates and amendments
- Regulation (EU) No. 10/2011 and subsequent updates and amendments

Italian Legislation:

- Ministerial Decree 21st March 1973 and subsequent updates and amendments
- DPR 777/82 and subsequent updates and amendments
- Ministerial Decree No. 76 of 18/04/2017 and subsequent amendments

FDA (USA):

- Title 21 CFR 177.1520 (a)(3)(i)(c)(1), (b) e (c) 3.1a. Ethylene-propylene copolymer for use in articles that contact food except for articles used for packing or holding food during cooking
- Aluminum is used in accordance with 21 CFR §174.5 and current FDA guidance. The anodized surface is considered inert and suitable for indirect food contact applications
- Title 21 CFR 176.170
Types of foods: II, III, IV, V, VII-A, and IX
Condition of use E: Room temperature filled and stored (no thermal treatment in the container)

Composition

The article is manufactured with the following materials/starting substances:

ALUMINUM AND POLYPROPYLENE BLOCK COPOLYMER (PP COPOLYMER)

It is declared that the product contains the following substances subject to restrictions in the aforementioned legislations:

NAME OF THE SUBSTANCE	CAS number
N,N-Bis(2-hydroxyethyl) alkyl (C8-C18) amine	39090 (PMREF)
9,9-bis(methoxymethyl) fluorene	182121-12-6
Aluminum	-
n-octylphosphonic acid	4724-48-5
octadecyl 3-(3,5-di-tert-butyl-4-hydroxyphenyl)propionate	2082-79-3

Migration test

The article complies with the limits of global migration based on analytical tests and/or theoretical calculations (see Article 18 of Regulation (EU) 10/2011), and is suitable for contact with foodstuffs for which the following simulants and conditions are envisaged:

ANALYTICAL TEST	TEST CONDITIONS	SIMULANT
Overall migration	2 HOURS AT 70°C – THIRD TEST	Ethanol 10%
		Acetic acid 3%
		Oil

Tests were conducted considering a surface-to-volume ratio of 1 cm²/mL.

The article, under the aforementioned conditions, also complies with the requirements of Annex II of Regulation (EU) No. 10/2011 regarding the migration of metals and primary aromatic amines.

“Dual-Use” Additives

It is declared that the material contains the following substances regulated by Regulations 1333/08/EC and 1334/08/EC (also known as "dual-use" additives):

ADDITIVE NAME	NUMBER (E or FL)
Sodium, potassium and calcium salts of fatty acids	E470a
Calcium carbonate	E170
Citric acid	E330
Silicon dioxide	E551
Polyoxyethylene sorbitan monolaurate (polysorbate 20)	E432
Sorbitan monolaurate	E493
Polyoxyethylene sorbitan monooleate (polysorbate 80)	E433

Validity

This declaration is valid from the date indicated below and will be replaced when there are substantial changes in the production of the material that may alter some essential requirements for compliance or when legislative references cited in section 1) are modified and updated to require a new verification for compliance purposes.

Viadana, 27/05/2025
